A new light on disinfection

Scan to learn more

UV Smart D45
Wall Mount

The D45 is a chemical-free device for high-level disinfection of ultrasound probes in just 75 seconds.

The challenge:

Limited Space in Examination Rooms

Examination rooms are **small and crowded,** with essential medical devices competing for limited workspace.

The Wall Mount:

Saving space and improving efficiency

The UV Smart D45 Wall Mount is designed to securely hold the D45 on the wall, keeping it within reach while freeing up valuable space in the room.

Key Benefits

Compact & Space-Saving

Reduces clutter by mounting devices securely **on the wall,** making it an excellent choice for small or busy rooms.

Adaptable & Versatile

Easily adjustable to **fit different work environments,** ensuring seamless integration into various clinical settings.

Maximized Efficiency

Keeps essential equipment **organized** and within reach, allowing for smooth and **uninterrupted disinfection workflows.**

A Practical Addition to the D45

The Wall Mount allows healthcare professionals to optimize their workspace while keeping the device easily accessible for fast and effective disinfection.

Configurations and Technical Specifications

uvsmart - emea

Configuration Options:

D45 Shelf only

D45 Shelf + Printer shelf

D45 Shelf + Drawer

D45 Shelf + Printer shelf + Drawer

The Probe Holder and Gel Holder can be added to any configuration.

Technical specifications:

Weight and size

Wall Mount Weight	Maximum Loading Capacity	Extension from the wall	Width
4 kg	**35 kg**	**327mm** (configuration 1 & 2) **380mm** (configuration 3 & 4)	**390mm** (configuration 1 & 2) **430mm** (configuration 3 & 4)

Installation and Assembly:

- Before installation, **consult your facility's service staff** to assess whether the wall is suitable for mounting the D45. The appropriate fixtures and plugs should be determined based on their assessment.
  Screws for securing the main channel to the wall are not included and should be selected according to the wall type. The screw holes in the channel are designed to fit M5 screws.
- The D45 must be secured to the top plate using 4 DIN 912 A2 - M6×20 screws (Included in the box).
- The D45 must be placed on its own channel.
  For configurations 3–4, an additional channel is required. The printer shelf alone does not require a channel.
